* Not included in this collection quantity are pans, felloes and other coarse-grained metals from households. The reasons for the reduction of the collection quantity in the last years are:

- the robustness of the partition of alu-packagings decreases steadily;
- the treatment in the sorter-centrals has improved with the result, that less waste is mentioned in the statistics.

¹ Amount collected by S.E.N.S / Swico (data from the annual S.E.N.S. report)

S.E.N.S and Swico collect only appliances from recycling companies with an appropriate license. There are also companies with a cantonal ORDEA-license, which are not considered in this amount.

² There is a detailed examination in the report "E-waste in Switzerland 2001"³ The reduction of 2002 compared to the previous year results from the withdrawal of a big company from the S.E.N.S-recovery system.**Source:** S.E.N.S
